

47th session of the UN Statistical Commission

PEACE, JUSTICE AND STRONG INSTITUTIONS: MEASURING SDG16

Tuesday, 8 March

13.15–14.30

General Assembly Building

Room CR 8

Measuring SDG16 presents many challenges to official statisticians and NSOs as it covers a wide variety of subjects and it spans through several fields such as governance, security, peace and justice.

Moreover, there is no international consensus on all definitions, there are substantial issues concerning the best ways and methodologies to produce information on them and many countries lack the expertise or resources to undertake these projects. This Side Event will present and exchange points of view on the experiences of different countries and international organizations that have been involved in producing statistics on these subjects.

WE WILL DISCUSS:

- How to measure rule of law and violence?
- How to measure governance and corruption?
- What are the latest developments of the Praia Group?

HOSTED BY:

The National Institute for Statistics and Geography of Mexico, the National Institute of Statistics of Cape Verde and the UNODC Research and Trend Analysis Branch.

MARIO PALMA

ANGELA ME

ADRIAN FRANCO
